

Eaton's Visual Power Manager Wins "Best IT Software" Category in 2017 Network Products Guide Awards

August 1, 2017 ... Eaton today announced that its [Visual Power Manager](#) software was named a Gold winner in *Network Products Guide's* 2017 IT World Awards® in the "Best IT Software" category. Network Products Guide, a leading technology research and advisory guide, annually honors products and top achievements in every facet of the information technology (IT) industry.

Visual Power Manager software's robust platform provides data center and IT professionals with the tools to monitor and manage power distribution in their infrastructure, including rack power distribution units (PDUs) and uninterruptible power supplies (UPSs). The user-friendly setup of Visual Power Manager streamlines the deployment process, relieving common pain points with software installation and providing easy deployment for operators of all sizes and types of data centers, from multi-tenant facilities to remote data closets. The software's real-time monitoring capabilities help improve business continuity and ensure that power is continuously supplied to critical equipment.

Network Products Guide has recognized Eaton products in its annual awards for four consecutive years. In 2016, Eaton's [Intelligent Power Manager™](#) software won Gold in the "Best IT Software" category.

The 2017 Network Products Guide winners are featured online at www.networkproductsguide.com. Winners were honored in San Francisco on Monday, June 26, 2017 during the 2017 SVUS Red Carpet Awards Ceremony Dinner.
